

**Any Misuse will automatically void the warranty.**

**The following is the definition of misuse: Please print it out and save to your computer. So when a customer asks you, then you can reply to them.**

If you have any questions, please let me know. Thanks.

1. Out of acceptable operating range of temperature or altitude
2. Self modification
3. Outdoor.
4. Other non-acceptable operation
  - a. Install & operate the UPS on movable equipment like truck or trains.
  - b. The installment environment is with lots of dust or conductive materials such as motor equipment.
  - c. Installment of the UPS in a compact space

This is available so that you can let the customers get a better understanding about what misuse of the UPS means.
